SESSION: 1961-62

EDITOR: Carole Andruski

Published by the Students of the Lakehead College
PORT ARTHUR, ONTARIO.

DEDICATION

The thirteenth edition of the Nor'Wester is dedicated with much pride and gratitude to an exceptional historian, philosopher, educator, and litterateur of Lakehead College, Dr. T. B. Miller. He has devoted himself selflessly to instilling the spirit of critical thinking into his students since his arrival in 1954 and has repeatedly given his experience and wisdom as staff advisor to our yearbook.

Dr. Miller represents much more than a great teacher to the students of this school. He is a man with humour in his heart, wit in his mind, and poetry in his soul.

BACK ROW: B. W. Stevens, S. Laskin, A. L. K. Switzer, R. R. Mutrie, E. G. Pallister, M. W. Babe, D. F. Hassard, M. W. Bartley, F. L. Stevens, R. Hyslop, R. S. Young, J. A. Crooks. FRONT ROW: H. S. Braun, Secretary; R. J. Flatt, W. G. Tamblyn, Vice-Chairman; E. L. Goodall, Chairman; D. I. Nattress, Vice-Chairman; K. A. Miners.

THE PRINCIPAL'S MESSAGE

It is a pleasure to extend congratulations and every good wish to the Graduates of 1962.

You are going out into a world which is changing rapidly. The rate of change during the last two or three decades is so great that I doubt it has ever been exceeded in world history. You will be gravely concerned with what is happening.

Responsible, representative, parliamentary government is one of our great achievements. We fought two world wars to preserve it. But the percentage of the world's people who enjoy this type of government is smaller today than it ever was.

The Christian religion gave to Western civilization a high regard for the value of the human individual; but Islam, which began 500 years later than Christianity, now has more adherents.

The painstaking perseverance of our scientists has given us the best weapons to fight disease that we have ever known. At the same time, they have enabled us to stockpile enough atomic bombs to destroy life on earth.

Our engineers, through automation, have made it possible to produce more goods with less human labour. At the same time, we are plagued by problems of unemployment.

These are just a few of the many problems you will be concerned about. I mention them, not to discourage you, but to challenge you. Problems provide opportunities. The survival of our civilization will depend on how you, and others like you, take advantage of them.

I would suggest that the only basis on which we can build a truly civilized and peaceful world is understanding. We must hold fast to that which is good in our tradition, but at the same time, we must be realistic in recognizing that there are other traditions at least as valid as ours, and we must make an effort at understanding them.

Universal understanding requires universal education. A strong desire for education already exists in all young nations but the means are inadequate. There is a growing awareness of this fact and attempts are being made to help. Examples familiar to you are the African Students' Foundation and the American Peace Corps.

You as graduates are members of privileged groups of the world society. The education that you, and others like you, have received has equipped you to accept leadership and responsibility. It is my earnest hope that you are prepared to do this. We pass on to you our traditions with our problems. It is your task to relate our tradition to other traditions and to apply this knowledge to the problems we share in common.

ARRESTED

On the sixth day of July, 1958, Dr. Hastings Banda, a man who had lived in the United States and Britain for over 40 years, returned to his home land, Nyasaland, in order to lead the Nyasaland African Congress, the only all African political party in Nyasaland. He wanted to break up the Central African Federation and initiate self-government for the people. He started his organization from Karunga, which is on the northern side of Nyasaland and moved to Prot Head in the south. Soon 90% of the people became members of his political party.

The Federation became shaken and worried because they believed that the allegiance of the Elite, people who are not really nationalists, couldn't lead the people properly. They were worried because Dr. Banda wouldn't accept a bribe of any kind so as to sell his fellow Africans. They didn't have a way of bribing him or hiding his political operations. Why? He was a dependent man who knew the colonials for quite a long time. He knew his European history and was educated for the task of emancipating Nyasaland from Colonial rule.

Dr. Banda told Powel Wolenski, the Prime Minister of the Federation, that federation had been imposed on the Africans. The Africans didn't like Federation for many reasons but only a few are pointed out here.

The Central African Federation began on the belief that only responsible people can run the government. When the Europeans say responsible people, they usually mean the Europeans themselves. In other words, the only responsible people in Africa, are the Europeans and therefore only they can run the government. They claimed the Africans were not educated enough to understand the principles of democracy. Thus, the Federation, instead of being a representative government, was represented with only fifteen Africans in a House of 55 seats.

Also, there was a qualitative franchise rather than a universal franchise. It was based on income and obviously most Africans weren't entitled to vote because their incomes are so low. The voter's roll was divided into three sections, the common voter's roll for anyone who earned 1300 £ per year, a special roll for those with grade 13 or over and the lower roll for those with a small income. These, however, were not entitled to vote in the federal elections and therefore out of approximately 8,000,000 African people, only 9000 voted.

When Dr. Banda was convinced that the people were properly organized, he called for an emergency conference on January 24, 1959. The Delegates who attended this private conference discussed matters of finance, co-ordination of the party and co-ordination of political parties throughout Africa. Meanwhile, the government thought we were planning a massacre plot.

On March 3, 1959, the state of emergency was declared in Nyasaland and every member of the Nyasaland African Congress was rounded up and arrested. That was called Sunrise Operation. The arrests started about one A.M. It was war and excitement to most of the people partly because they didn't know the reasons why they were being arrested and partly because they didn't know what the state of emergency was.

On that particular night, my family and I were all in bed. Suddenly I heard a big bang on the door. I lit the lamp and rushed towards the door but before I opened it, I heard a crash and saw policemen rushing into the house. They grabbed and handcuffed me and when I asked them what they were doing, the only answer I received was a slap across my face and I kept quiet. Then they searched my house and took all my books. Then they read the warrant which went like this: "Akogo Kenyanya, you are arrested under the emergency regulations and on the orders of the Governor of Nyasaland Protectorate. You will be put in a prison indefinitely."

With these words, I was pulled outside and led to a boat about 300 yards away from my home, where I found about six of my colleagues.

On March 4, we were removed from prison and placed on a steamer which took us about 300 miles from home. From there we boarded a train which carried us another 100 miles. After disembarking, we were loaded into a truck and taken to an airport. From there we were flown to Southern Rhodesia. There we were put in the Khami Prison, with about 1300 other prisoners. We all had a cell about 10 feet by six, where we were kept for about three weeks without any news from the outside. No noise, talking, or singing was allowed.

Slightly we were allowed a little more freedom until our final release 16 months later. Meanwhile, however, we had to undergo intensive interrogation and torture. Some of us were able to hold back, but we were not used to torture and many told lies to stop it.

'62 NOR'WESTER STAFF

"Tomorrow and tomorrow and tomorrow!" How familiar these words are. They represent the motto of not only we, of the College, but also of many of our fellow Canadians.

We fling ourselves into the business and professional worlds, bursting with energy, eager for adventure, and prepared to undertake anything with which we come into contact. However, when the actual task is set before us, we tend to put it off or disregard it altogether, hoping it will be done by someone else and overlooked by the rest. This is carried on by the majority until all the burdens rest on the shoulders

of one. Then we ban together to criticize and complain if the least little thing is not done right or on schedule.

This procrastination is begun very early and protection is achieved during our school years. We start at a slow pace and gradually work up to a gallop, leaving homework and essays to the last minute, or not even bothering about them at all. Then if failure results because of our wastefulness or laziness, we criticize our teachers for poor lecturing or claim they dislike us.

This also goes on in many of the clubs and activities of the school. We put things off and complain about the poor organization on the campus while we are not fully prepared to accept any responsibility ourselves or render some of our spare time in helping.

If we are to build a big and better Canada, a country in which we will be proud, we must learn to accept and share responsibilities right in our own home and school. We must not put off for tomorrow what we can do today. We must make the most of every minute we have for "time wasted is existence; when used it is life."

In closing I would like to express my deep appreciation to Bill Shannon who contributed greatly to the Sports Section, and also to Donna Ernewein, who aided immensely in the Advertising Section.

PRESIDENT'S MESSAGE

In the highly specialized and competitive societies such as those existing in the world today, one discovers that it is impossible to live in ignorant isolation. One has certain obligations to society and himself, which he must fulfil in order to keep this unit functioning. If he fails in these duties, anarchy is the product.

At the beginning of this year, many people were nominated for different positions on the Student's Council. However, many refused to stand for election — not because they were interested in pursuing their academic careers, but because they were not interested enough to take responsibility upon themselves. Apparently this apathetic attitude is not peculiar to the College. It is a Canadian problem.

A glance at any newspaper will reveal the lack of public interest in municipal, provincial and federal affairs. We, as university students are obliged to take an active part in our communities and to provide leadership whenever and wherever possible.

We like to talk about and condemn such issues as communism, fascism and racial issues, but in doing so, we reveal ourselves as typical Canadians. A typical Canadian has evolved into a loud talking, severely critical, but totally irresponsible person. He does not take his proper place in the community, but leaves his obligations to a certain few civic minded people.

It has been fortunate that these few people, such as those elected to municipal, provincial and federal offices have been a conscientious, competent group. However, we cannot rely on this good fortune to continue. A time will come when unscrupulous, materialistic men will supplant these idealistic citizens, unless we, as Canadians, participate more fully in this society which we are prone to condemn so quickly.

Despite the lack of nominees to fill the positions on the Student's Administrative Council, I feel that those elected were highly capable and efficient. Besides taking an active part in student's affairs, the Student' Council was able to initiate the first Lakehead College Carnival and provide other new and beneficial social events for the student body.

I would like to thank Rod Ward and Tim Jokela for their help and the work time they gave selflessly to the student body. I would also like to thank Mr. Braun and the staff for the help and advice they gave throughout the year. I think that many local merchants and business concerns also deserve credit for the help they gave throughout the term to the students of the Lakehead College.

PRESIDENT'S MESSAGE

If hard work is the way to success, then the 1961-62 athletic programme must have been very successful indeed. Every person on the athletic council did his share and more to bring the students of Lakehead College a full, well rounded programme of sports.

The greatest excitement this year was caused by the amalgamation of Lakehead College with the Port Arthur Mustangs to form the Lakehead College Mustangs. The student body had every reason to be proud of the team and they proved it with strong support from the start of the season

through to the last game. The students paraded from the school through the down-town business section and on to the stadium. The Mustangs then went out on the field, beat the Ukes, and advanced into the finals against the Redskins. The Redskins proved to have too much finesse for the rookie studded Mustangs and beat them two straight to gain the championship. Practices start in 1962 on July 15 and the Mustangs have the intention of winning the championship and have a better than even chance of doing it.

Ray Inaba and Bill Tomlinson took care of curling this year and did a tremendous job of it. Curling was our best participation sport with fourteen rinks entered. The competition was so even that no team went through the season without a loss and rivalry between teams was a thing to see.

Squash was also a new sport started at the College this year, and it proved very successful until we ran out of racquets. This game will take off more pounds and put a person in shape faster than any other sport I have tried.

Table tennis was another sport that was received with a great deal of enthusiasm after being away from the school for quite a number of years. Mel Coutanche set up a few tournaments during the year, and Jim Arnot proved to be the school champion.

Hockey is here to stay. It was met with such enthusiasm we had forty persons out for our first three practices. Gilles and Roger LeBlanc coached the team and were ably assisted by Gordon Pearson. Although we did not win many games, it was not due to lack of desire. The team played Port Arthur Collegiate, Hillcrest High, Lakehead Teachers' College and Terrace Bay, and put in a good showing at all games. We played eight games this year winning four and losing four.

We changed from five pin to ten pin bowling this year, and it proved very successful considering that it was the first time for most of the students. Ray Inaba and Dan Wolframe are to be complimented on the way they ran the bowling league, for I don't believe it could have been as successful without the work they put into it.

Ron Maines and Mel Coutanche did a bang up job with the basketball team, and for the second year running, we have been well represented in the league.

Arlene Waugh was the girls' representative at our council meetings and was a tower of strength all through the year. Arlene and John Pugliese were the work horses at our very successful banquet, and they deserve all the credit for its success.

As I look back upon what I have written, I notice I didn't work half as hard as I thought I had. It sure was nice to have a strong council. I wish to thank them all for their wonderful support and mention the work done on broomball by Ken Smith and Keith Srigley. To all of them, I say goodbye and thank you.

PUBLIC RELATIONS

CAMERA CLUB

Ken Buckell
President

Sin Soo Kung
Vice-President

Denis Hill
Secretary

The Lakehead College Camera Club started in October with a membership of thirteen but as the year passed, it decreased to eight. The Student's Council made a grant of one hundred and fifteen dollars, with which chemicals and equipment were purchased. Various types of papers were experimented with, and some very interesting pictures resulted.

Although the life of the club was brief, the art of photography was enjoyed by all.

RADIO CLUB

BACK ROW: Leo J. Lafontaine, Jack Green, Mike Skillen, President; Ean L. Hays, Secretary-Treasurer. FRONT ROW: Jack Brodack, Business Agent; Esko Kasma.

Since starting anew last year the club has continued to grow. As is usual, a core of eight or ten dedicated "Hams" kept the club alive.

During the year several ambitious projects were undertaken. The kit building group built a 60-watt transmitter and a high frequency transceiver.

An informal discussion group was organized with everyone contributing. The talks were on electronic topics and proved quite informative and interesting to the members.

A short-wave listener contest was held to better acquaint the new members with the vast number of stations off the broadcast band.

A code class was started in an effort to make a few new "hams" in the club. The members practiced their skill on the new transmitter and a few hams who could decipher our efforts, were contacted.

Most of the members will be leaving this year, and the job of keeping the club moving will be up to a few. I'm sure that the club will be even bigger next year due to the interest stirred up this year.

A club like ours can do much for a college. We contacted other universities like McGill and Western, and proved to them that a smaller College can have as active a station as the largest University.

CIRCLE K

BACK ROW: Philip Asseff, Douglas Bruce, Wally Mitchell, Leo Lafontaine, Denis Lake. FRONT ROW: Rod Ward, Pat McGrath, Mr. McKenzie, Eric Berglund, Doug Brown.

The Circle K club is a service organization for college men operating on the campus and is similar to Kiwanis and other service clubs. It is a leadership and character-building group which serves the campus and community.

Circle K is an opportunity for College men because it provides a means of leadership in a college community that service clubs are giving in the business and professional world.

Circle K is an opportunity for the colleges and universities through the fostering of an organization unlike any other on the campus. Circle K broadens the opportunities available to students through personal contact with business and professional leaders. It provides a means for the development of initiative and leadership among students not to be found in the regular curriculum. It helps the schools to make its students conscious of basic Canadian ideals and of the responsibility of preserving them. It provides the medium for accomplishing projects to assist the school in social and academic rehabilitation programs. It maintains an important tie with the community and enhances the campus-community relationship.

Circle K is an opportunity for the community and the nation because it helps to develop future leaders and citizens whose philosophy is founded on freedom, initiative, and the Canadian heritage.

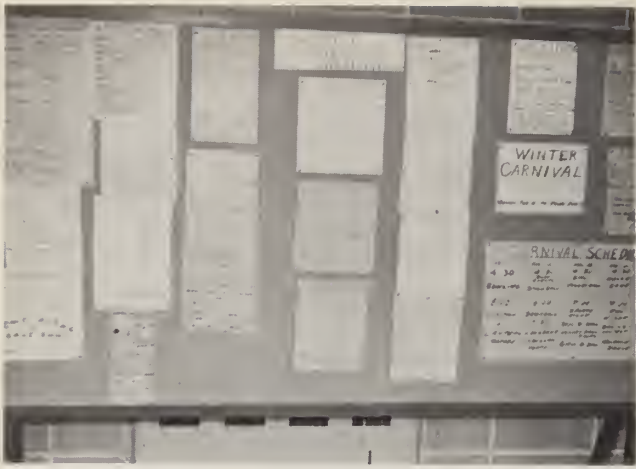

George Kenya

As in Kiwanis, the Circle K motto is "We Build", a building for justice, liberty, democracy, and a better world in which to live. The Circle K club is not just an organization but a driving force, developing the leadership for tomorrow while it creates a better college or community today.

SPORTS

BROOMBALL

This year, thanks to Mr. Weatherman, two teams ended up in a tie for first place. They were Forest Technology II and Arts I.

Broomball was still our real rough and tumble sport with a lot of body contact and good team spirit.

Perhaps the highlight of the season was the desire of the small but fast Mining Technology team. They seemed to be on top of the ball at all times, but the larger teams seemed to wear them down and beat them in the final minutes of the game. Forest Technology II were the champions last year, and their knowledge seemed to carry them this year. Of course, the play of Ted Kari and Ken Crompton added a lot to their offensive punch. Arts I had

an all round good team, with very few individual stars. They were dangerous at all times and proved it by tying for the championship. All the other teams in the league won at least one game, but were out for the enjoyment of the game rather than winning the championship. They provided much of the spectacular broomball with their hard hitting and wide open play.

Taras Kozyra was voted the most valuable player in the league with many other players a close second. Taras was fast, clean and scored a good number of goals. He was a standout on his team and is well deserving of the award.

BASKETBALL

In the second year of sponsorship by the College and the Mustang Athletic Club, a basketball team was entered into the Lakehead Senior Basketball League.

After the first few games, the team seemed destined for the top with such players as Gerald Bell, Doug Brown, Mel Coutanche, and Denis Lake hitting for points. But as the season grew old, and the basket began to get farther away, we found ourselves fighting for the final playoff berth. When the twenty-two game schedule was completed, we were tied for first place with Westfort. Due to a better for-and-against point total, we lost out.

However, the boys must be congratulated for their undying desires and tremendous attempts to the final whistle, while they were burdened with their final examinations.

David Trochimchuk

Our congratulations go to Denis Lake for capturing the most valuable player award and also to Mel Coutanche for the most points scored award.

In closing, I would like to thank our supporters, few but faithful, and add, that next year when uncorralled, the Mustangs will stampede to the range (court).

BOWLING

LEFT TO RIGHT: Kenneth Chomut, Peter B. Marbes, Barbara Barth, Dan Wolframe.

The bowling season started off on a different note this season when the bowlers voted in favour of having a ten pin league. Eight teams were formed and within a few weeks competition became keen as bowlers old and new alike "took to the alleys" on Thursday evenings.

The season consisted of two series with the winner of each competing for the championship in a two game, grand aggregate point sudden death final.

The teams contesting for this honour were team No. 3 captained by Mike Matich and team No. 4 captained by Ken Chomut. The Chomut team won by a score of 1515 to 1470.

The final standings were as follows:

| | | |
|--------------------|-----------------|-----|
| Girls High Game | Carole Andruski | 172 |
| Girls High Double | Lorraine Zizman | 320 |
| Girls High Average | Lorraine Zizman | 136 |
| Mens High Game | Eugene Prpich | 236 |
| Mens High Double | Eugene Prpich | 429 |
| Mens High Average | Paul Dennison | 162 |

It can be undisputedly said that this was without question, the best ten pin league Lakehead College has ever produced.

CURLING

Lead, Hugh A. Yerex; Second, Bertrand B. Buchanan;
Third, Lois M. Styffe; Skip, Raymond T. Inaba.

This year was no exception in the participation, by the college students, in the rapidly rising sport of curling. The Curling Club consisted of fourteen rinks. Due to the increase in number and interest on the part of the girls, the Curling Committee decided to place at least one girl on each rink and let her curl in the third position.

The schedule was drawn up so that it consisted of two events. The first event was won by the Gerry Dillabough rink, with Carole Andruski, third; Pat Flanagan, second; and Peter Graham, lead. The second event was won by the Ray Inaba rink with Maureen Styffe, third; Bud Buchanan, second; and Andy Yurex, lead.

When these two rinks met in the sudden death

play-offs, the Inaba rink won 10 to 9, gaining the curling championship.

As usual, the staff played an active role, placing two rinks in the club this year. The perennial contender, Mr. McKenzie and a new comer Mr. Markovich. Although Mr. Markovich was a beginner, he sports-mindedly took the task of skipping a rink and made great strides of improvement during the year. I'm sure that if he continues in the "roaring" game, he will be a strong contender to any rink.

We hope that in the near future, the College Curling Club will become large enough to form its own executive and play an important role with the Athletic Council in promoting sports at the College.

FOOTBALL

In 1961-62 Lakehead College launched itself into another era of sports endeavour — football.

This year Lakehead College amalgamated with the Port Arthur Mustangs to form the Lakehead College Mustangs Football Team, and no happier a marriage can be seen anywhere.

Not only did we do well as a team, but individually, the most yards gained was won by Dennis Trevisenutto, the scoring championship was won by Mike Henderson and the top lineman of the year was won by our Kevin McGonigal. We were runners up for the rookie of the year award and had the second best kicker in the league. Three of our players, Ted Bradford, Bob Climie and Bob McMillan have been invited to the Regina Roughriders training camp for a pro try-out, but as yet, have not decided if they will go, due to former commitments here at the Lakehead.

A great deal of our good showing in the 1961-62 season was due to the hard work and many hours put out by Danny O'Gorman, our Head Coach, who was ably assisted by our Line Coach, Rod Mc-

Leod and our Backfield Coach, Mr. Ted McKenna. The team had a hard working manager in the person of Alex Horbow, who I believe, if it were possible, would have put on a set of pads and gone on the field himself to help the team.

No matter how excellent the coaches and managers were, and no matter how loyal our fans were, the 1961-62 Mustangs was primarily the team that finished a dismal last the year before. What, then, happened to the team? Perhaps it was the College environment, or perhaps the tremendous College crowds. But whatever happened to the team, it seemed somehow to be connected with the College. For this, we can thank Mr. H. S. Braun, Principal of Lakehead College, Mr. D. Clarke, Jr., and Dr. R. R. Mutrie, Directors on the Board of Governors for the insight they have shown in providing the College with a team to be proud of.

And what of next year? The team will be out again in full force, a little stronger, a little smarter, and a lot tougher to beat.

A NORTHERN DAY

Silence in the lonely crystal spaces
Sun-glittering magnificence
Breath of Liberty.
Shrouded in a snow-mist
Unfathomably deep
In slumber pure the Northland-Spirit lies,
His dark, green branches silvered through with snow.
Dream-visions of his mighty sleep
Are the windy clouds that drift
Across the azure-metal of his skies;
Manifestations of his holy power.

Now, the cadence of a distant song
Is heard from far upon a vagrant wind;
Beautiful in sadness, sweeping low
From all the scattered reaches of the earth;
The fury of the fire-winds, whispering
Eternal lamentation to the world.

Suddenly
All tumult ceases, frozen;
The brilliance of noon
Grows softer in the long blue afternoon,
While moving shadows lengthen on the snow.

Twilight comes upon the sleeping earth,
A vast blue chamber is the darkened sky.
Alone, the splendor of the evening star
Rises on the dying fires of day.

A winter's day has passed;
Now comes the silent mantle of the Night;
He hides our earth from us
But opens up the star-built Universe.
The tumult of this strange and lonely land,
Inwreathed with silence and celestial fire,
Lies calm beneath the lucid moonlight still;
Dark shadows of the midnight wait for day.

G. C. Coutanche.

TO THOSE THAT LEAVE

Why do they leave,
They that leave for distant places
Across seas and continents,
Beckoning with fair promises
Of riches?

Do they think of what they go to
Rather than what they leave behind?
Wiser-years later, sitting alone in
Dry distant lands, do they remorse —

— and think of the green hills,
Thick sun-shut woods and rambling
Blackberry bushes with dark, oval fruit
Hanging from prickled branches intertwined to protect
Some youthful, hidden secret in their depths,
The path oft-tred by young feet down to
The clear, oval pond that gave seclusion to their youth,
Its willows dipping lowly their slender branches
In the cool ripples of its surface,
Playing shades to the black, wiggly
Tadpole and gaily splotched newt,
On swallow-sultry summer days?

— and think of their street, bare to the foreign eye,
But holding something extra to those that leave,
Holding each stone, each post, each fence as a memory,
Down to the inn on the corner, where noises come,
With music, laughter, and the clatter of glasses?
To each there is such a street.

Do they return? Yes, some return,
Overcome by the deep, empty feeling of their lives,
Some will never return, some will die of it —

But still they go.

Chris Andrews.

NEW LECTURERS

Miss Alice Waunita Christensen came to the Lakehead after graduation from the University of New Brunswick. Born and grown up in a Danish-speaking community in that province's potato country, she has always had a particular love for the wonders of nature. One year at Teachers' College and teaching could not have been the right choice, for she returned to studies at UNB and earned her B. Sc. in 1961. She is a welcome addition to the all-male teaching staff here and is reported to have saved many a curling game for her rink. At work her main concerns are biology for nurses and chemistry labs, and at home she is learning to master the intricacies of sewing a collar for a blouse. The coming summer should see her return to the Maritimes to disprove popular claims concerning studied women's marital prospects.

Born in Eastern Ontario, Frank M. Doan has come to Lakehead College well prepared to teach philosophy. He received his B. A. and M. A. at the University of Western Ontario, and then continued on at the University of Toronto where he received

his Ph. D. in 1952. His teaching career is both wide in expanse and experience. Dr. Doan began as a lecturer at the University of Toronto, continued on at Indiana University and the University of Houston. He left Houston as an Associate Professor of Philosophy and travelled to Lakehead College.

His vast experience also includes many publications on metaphysical and linguistic problems in professional journals such as *Journal of Philosophy*, *Philosophy and Phenomenological Research* and *Review of Metaphysics*. He is presently engaged in writing an Introduction text in *Philosophy*.

Dr. Doan's extra-campus activities have included lecturing to many local groups. He contends that he has no hobbies, but that his interests lie in Philosophy, Science and especially in the improvement of education.

Mr. James B. Leonard, a Nova Scotian by birth and breeding, passed his early years in the distinctly rural setting of the Annapolis Valley apple district. In his formative years, he resided in Dartmouth and later Halifax, where in 1960 he received the A. B. degree with honours in English at Dalhousie University.

Coming west, he spent the 1960-61 academic year at Queen's University, Kingston, pursuing a course of study toward the M. A. degree in English. While at Queen's, he also taught part-time in the English department. Still farther west, he came to Lakehead College last fall to lecture in English, and, despite the nurses and their noise, taught successfully a variety of courses in composition, rhetoric, and general literature. Mr. Leonard's future plans include completion of his M. A. degree, another year of teaching, and a program of study for the Ph. D. in English — not necessarily at a far-western university, however.

It is not surprising that these migratory years have aroused his interest in travel and, looking upward, astronomy. Encouraged by a rather low-fi set and many fine records, he has developed a taste for music of the baroque and classical ages, Vivaldi, Bach, and Mozart being his favourite composers. Although the strenuous requirements of teaching over half of the student body the rudiments of English has taken most of his time, he has occasionally found time for curling and social functions. With a full teaching year behind him, he hopes in the future to broaden his activities and show the Lakehead students that Nova Scotians are not necessarily so cold and hard as the rocky terrain they inhabit.

REFLECTIONS

When we came two years ago,
We found a land of ice and snow,
A land with darkness and with night
But friendly people made it bright.

The students helped to make it fun
With broomball, curling, pong-a-thon,
Parties, dances, stags, and song;
Memories we will take along.

My colleagues also made our stay
Enjoyable in every way;
Sometimes discussiin, sometimes advice,
And even fishing through the ice.

But most important of them all,
And that is what we will recall,
Lakehead has a hall of learning—
A hall which keeps the candle burning.

The Light of knowledge gives man Sight,
Gives him Power, gives him Right,
And points to him without amiss,
That ignorance is NOT bliss!

When we came two years ago,
We found a land of ice and snow,
A land with darkness and with night,
But Lakehead College gives it light.

S. C. Markovich.

the value of a smile

It costs nothing, but creates much.

It enriches those who receive, without impoverishing those who give.

It happens in a flash and the memory of it sometimes lasts forever.

None are so rich that they can get along without it and none are so poor but are richer for its benefits.

It creates happiness in the home, fosters goodwill in a business and is the counter-sign of friends.

It is rest to the weary, daylight to the discouraged, sunshine to the sad and nature's best antidote for trouble.

Yet it cannot be bought, begged, borrowed or stolen for it is something that is no earthly good to anybody till it is given away!

And if it ever happens that someone should be too tired to give you a smile may we ask you to leave one of yours?

For nobody needs a smile so much as those who have none left to give.

BANK OF MONTREAL

A new milestone in the development of the Lakehead College of Arts, Science and Technology was reached November 23rd, 1961 when the Bank of Montreal opened an office at the College. The office was established as a convenience to students to bring modern day banking facilities closer to home and, while banking hours at present are from 12:15 to 1:45 P.M. on Thursday of each week, additional service will be provided when the need arises. It is stressed that students who use the facilities of the College Campus Branch will not have their banking arrangements confined to the office hours in effect at the College. During the rest of the week all records for the sub-agency are carried at the Bank's Main Office, Cumberland and Park Streets, where full-time facilities are available at regular banking hours.

The office is under the direction of Don McNeill, Accountant of the Bank of Montreal's main branch, who will be most happy to meet and discuss banking arrangements with the students.

CONGRATULATIONS TO

"Perhaps the most valuable result of all education is the ability to make yourself do the thing you have to do, when it ought to be done, whether you like it or not; it is the first lesson that ought to be learned; and however early a man's training begins, it is probably the last lesson that he learns thoroughly."

Thomas Henry Huxley

LEARNING IS THE GATEWAY TO PROGRESS

The Public Utilities Commission operates for the citizens of Port Arthur a modern Electric Distribution system, Telephone system, Water system and Transit system efficiently and economically. Through constant engineering and improvements to the capital plant, we are able to offer industrial, commercial and residential services free from nuisance interruptions at rates which invite comparison with rates in other parts of Canada. This progress is only possible through learning and planning.

education for leadership

Collège Militaire Royal de Saint-Jean,
Saint-Jean, P.Q.

Royal Roads, Victoria, B.C.

Royal Military College of Canada
Kingston, Ontario.

80-107

A strong sense of duty, readiness to accept responsibility and the ability to lead . . . are some of the qualities required of an officer in Canada's Armed Forces. The development of these leadership qualities in this modern age demands the best in education and training.

The Department of National Defence will sponsor, through the Regular Officer Training Plan (ROTP), a selected number of qualified high school graduates to obtain an education through the Canadian Services

Colleges or through most Canadian universities, leading to a university degree and the Queen's Commission. This training prepares cadets for a career as officers in their chosen service, the Royal Canadian Navy, the Canadian Army or the Royal Canadian Air Force.

There is also a limited entry for those who would choose to obtain higher education at the Canadian Services Colleges at their own expense, and serve after graduation as officers in active components of the Reserve forces.

ROTP

Full details concerning the Regular Officer Training Plan, or entry into the Canadian Services Colleges, as a Reserve cadet, can be obtained without obligation from your nearest Canadian Armed Forces Recruiting Centre or by writing to the Director ROTP, Department of National Defence, Ottawa, Ontario. Closing date for candidates applying for 1962 FALL CLASSES is 1 July, 1962.

THE FORESTER'S PRAYER

"O Lord, who watches over the seeds in the soil and the flowers in the field, look with favour, we beseech Thee, on Thy wondrous creation, the manifold trees in the great and bountiful forests. Guard them from the terrors of fire; protect them from the ravages of disease; save them, both great and small, from wasteful, destruction by wanton hands. And grant that, under Thy tender care, they may grow and prosper and, joining with the winds of heaven, ever sing Thy praise with joy and gladness."

A Career with a Future

The successful development of its many resources has given Ontario a pre-eminent position in the economy of Canada has made it a better place in which to live.

In the field of mining few areas can offer more to the man of imagination than Ontario's vast mineral empire an unlimited potential of nearly 300,000 square miles of rock formations favourable to the deposition of minerals useful to man.

In only half a century mining has become one of Ontario's greatest industries. It is still growing, and as it develops so do jobs — interesting jobs with a purpose — jobs with a future.

The mining industry is looking for young men — especially those with degrees in geology, engineering and metallurgy to fill positions of major responsibility.

THE ONTARIO DEPARTMENT OF MINES

Hon. James A. Maloney, Q.C.
Minister

H. C. Rickaby
Deputy Minister

- Progress and employment in Canada's mining enterprises will depend more and more on technological advances.
- Technically-trained personnel are able to participate in this progress.
- Where do YOU fit in!
